

NEW: AGRICULTURAL MOVING-FLOOR TRAILER

As part of Profitable Solutions, Knapen Trailers offers you a new agricultural moving-floor trailer. This unique agro-trailer is an excellent addition to our Agro-concepts: outstandingly suitable for agricultural use not only off-road and in the field, but also for regular road transport. A true all-rounder that can be used profitably during the harvest, and also throughout the entire year!

The new agricultural moving-floor trailer is supplied with 'on the road' tyres and 'off-road' tyres. If the agro-trailer has been fitted with 'on the road' tyres, you may drive on all roads for general traffic, without a speed-limiting device. With 'off-road' tyres you can drive off-road, in the field or on roads up to a maximum permitted speed of 65 km/h. This agro-trailer complies fully with the German LOF approval requirements. This provides many advantages, which include exemption from road tax, toll fees, ban on Sunday traffic and the digital tachograph. Thanks to its versatility it is possible to use the agricultural moving-floor trailer 12 months per year. Profitable for you, all year long!

The benefits:

- Large volume
- Low weight
- Deployable 12 months per year (pallets, big bags, straw bales)
- 3 months 'off-road' tyres, 9 months 'on the road' tyres
- Even faster unloading, thanks to the high speed floor combined with hydraulic tailgate
- Meets all the German LOF approval requirements.
